

Assignment

For your ability to express your understanding of digital analytics, just go through the first two videos in this course: **101: Get started using Google Analytics (GA)** - [Link](#)

The videos are :

1. Use Digital Analytics to Grow Your Business
2. Learn How Google Analytics Handles Data

Once you have gone through it, just prepare your video to answer the following questions:

1. Explain clearly what do you understand by Digital Analytics and also give a clear real life example of how you would use digital analytics
2. Explain the marketing funnel with a very clear example
3. How does Google Analytics collect and process data? Explain what tag and tag manager are.
4. If you go to a site that has been implemented with Google Analytics at the same time from google chrome and internet explorer, will you be counted as a single user or as 2 separate users?
5. What is a session? Please explain very very clearly with an example.

What we would be judging you on:

1. How clearly you grabbed the concept
2. How confidently you express it

The above 2 criteria are important as we are an agency and we work with international clients. You will be speaking to people in foreign countries and hence its critical that you not only know about your task, but also can clearly express the same to the clients.

Make sure you are doing this assignment via a Loom video and make sure to keep your face visible and share the link (accessible one) on mail.

Guidelines for the Assignment:-

- It is mandatory to share the whole screen while answering.
- Please do not to write and read their answers, using ChatGPT is **strictly prohibited**
- Please make your videos in one go, no pausing (pausing = cheating)
- Be as natural as they can be. You can be wrong but your sentences need to be genuine.
- Close all tabs and applications in the background. Just one browser with 2 tabs, one for loom and one for questions doc
